PARTNERS

Bluewrist, founded in 2006, offers a variety of automation products and solutions in the areas of robot guidance, bin picking, flexible inspection and industrial system communication.

Established in 2001 as Kyokutoh's North American division, **Changer & Dresser Corp.** has built a strong network with various partners in the US. Backed by the recognition of solid performance, quality, and service, C&D has become one of the premier leaders in tip dressing and tip changing technologies.

Chesterton Connect™ is a simple to use data acquisition tool that enables you to safely and conveniently monitor your process and equipment's operating conditions. Using Bluetooth® technology and a robust design to withstand harsh environments, Chesterton Connect™ makes it easy to monitor.

Since its founding in 1943, **CKD** established itself as the premier manufacturer of pneumatic components, general-purpose valves, mechanical indexing systems, and semiconductor products in Japan. CKD Pneumatic fluid control and automation technologies offer a vast amount of cutting-edge products, such as popular CKD valves and CKD cylinders to users in every industry.

Coval's vision as vacuum managers is to be the world's leading solution provider of vacuum automation technology. Through innovative company culture, service excellence, and knowledge sharing we aim to be a driving force behind our clients' business performance worldwide.

Eisele was established in Wainblingen, Germany. With 100% in-house engineering and manufacturing capabilities, they are known for providing the highest quality in robust and durable fittings and multi-line connectors.

ESG USA has been dedicated to designing and manufacturing high-end stainless-steel pneumatic valves, including angle seat valves, shuttle valves, diaphragm valves, butterfly valves, ball valves, pressure reducing valves, steam traps, check valves, and strainers, which are widely used in various industries, such as textile dyeing, EPS molding, air separation, chemical, food, and pharmaceutical.

Gorbel has a comprehensive line of Crane Technology products, Ergonomic Lifting products and, a line of Tether Track Fall Arrest Safety Systems.

HELUKABEL® is today one of Germany's leading cable companies, boasting an extensive range of cables, wires, special cables, media technology, cable accessories, as well as data, network & business technology.

Murrelektronik is a global leader in the development, manufacture, and distribution of automation solutions. Their products can be divided into four core lines: Power Supplies and Control, Interfaces, Cables/Connectors, and IO Systems.

Proteus WeldSaver™ is the leading water safety device for flow control and leak detection in robotic welding applications. Whether monitoring coolant flows to weld guns or to the entire cooling circuit for a weld cell, it rapidly and reliably detects losses of flow continuity created by cap loss, hose burst, or other catastrophic events.

Robotize offers a wide range of Autonomous Mobile Robots (AMRs) and accessories that set new standards for easy deployment, flexibility and safety when automating your internal material transportation.

Stäubli is renowned as a technological pioneer in the development of robotic tool-changing systems, boasting a rich history of innovation and expertise across various industry sectors. Their products are designed to enhance productivity and flexibility in automated processes, making them an ideal fit for our clientele.

With a complete range in pneumatic, mechanical, electrical, and modular tooling, **UNIVER** has been an automation leader since 1971. They continue to be the ultimate single source for clamps, pivots, valves, cylinders, grippers, fittings and vacuum solutions.

VOGT's ultrasonic inspection devices for the fast and precise inspection of welded joints in production, especially spot welds and short weld seams.

Wenglor's The innovative company for smart sensor and image processing technologies.
